Gender: Male

Date of Birth: 04 Jan, 1981

Home Address: 1 Adebakin Crescent, Ikosi-Ketu, Lagos

Summary

I am a strategic thinker with over 9 years of Banking experience and extensive knowledge in Finance, Budgeting, Compliance, Credit Risk Management and Data Analytics. I like to contribute in problem solving and decision making capacities. I am a team player with excellent presentation abilities and interpersonal skills who works with little or no supervision

Accomplishments

- Created an ETL solution for a loan origination and collection software from an Oracle database to a SQL Server database. The solution validated incoming data and performed notifications when jobs complete. The information of borrowing customers was loaded into SQL Server and was used to generate reports using the SSRS 2012 reporting functionality. Reports were set up for automatic delivery based on standard report subscriptions and on demand from the loan application.
- Worked in a team to design a loan collection service for salary backed retail loans according to business requirements, this was implemented using robust stored procedures, functions and triggers to implement required functionalities.
- Created various reports, scorecards and dashboards, using a combination of SAP Business Objects, IBM Cognos, Oracle OBIEE suite and Microsoft BI stack per business requirements for all strategic business units in the organisations that I have had the privilege of working with .
- Analysed the business requirements and systematically designed a database of borrowing customers to assist in the timely rendition of Credit Bureau reports and other credit related regulatory reports. Employed best practices in creating a complete schema including tables, relationships, stored procedures, views, clustered and non-clustered indexes and triggers. An event triggered job was used to automate this using a combination of ETL tools and database objects.
- STAR Award in the Union Bank Employee Recognition (UBER) scheme for outstanding contributions towards the achievement of the bank's corporate goals by going the extra mile in designing and automating the BI DataMart build system that delivers the banks Risk Management, Finance and Regulatory reports on time with minimal human effort. That was achieved by building PowerShell/Batch Script for SQL Agent around ETL jobs, starting from the initial staging data up to publishing final BI products. Utilised Relational Data Modelling and Dimensional Modelling in the multiple program areas within the bank's Data warehouse system with the best practices of Star Schema implementation.
- Developed numerous ad-hoc SQL reports and also leveraged on the Tabular and Multidimensional models built using SSAS to introduce the organization to the concept of selfservice BI.

Experience

First Bank Nigeria

May 2018 to Present

Team Lead, Performance Reporting

Lagos

- Plan, coordinate and supervise all activities related to the design, development and implementation of BI/MIS
- Coordinate maintenance, support and upgrade of existing BI/MIS systems and applications
- Ensure accuracy and timeliness in delivery of reports
- Review technical constraints and performance issues of business intelligence and MIS solutions
- Perform and coordinate coding duties in SQL, PL/SQL, PowerShell, Python etc.
- Coordinate program unit testing, integration and system testing to ensure they meet quality standards

Union Bank Nigeria

October 2014 to May 2018

Team Lead, Business Intelligence/Analytics

Lagos

- Manage delivery of BI solutions (portals, dashboards, standard and ad-hoc reporting) with a specific focus on data management/governance, and data warehouse architecture using SAP, Microsoft and IBM BI tools
- Manage through communicating requirements-oriented tasks and architecture, expectation setting for desired outcomes to guide team down a successful execution path
- Project assignments and tracking, as well as individual technical development plans
- Partner with Business Managers and DW Architects, oversee planning, estimating, and project commitment date setting to ensure delivery and appropriate resource allocation
- Manage project expectations, ensuring consistent execution and quality of delivery
- Drive critical project and product trade-off decisions
- Maintain resource forecast and resolves resource conflict and risk
- Ensure utilization of investment allocated to team through balance of projects, goals, and training
- Collaborate with Project Managers and Business Analysts
- Designs, develops, and unit tests standard and ad-hoc reports.
- Influence the direction of BI architecture, platforms, versions, and tool sets
- Validates the data warehouse feeds into the reporting tools.
- Conducts data investigations and assists the business partners with complex data analysis and adhoc queries.
- Works to enable business partners in the development of their own reports and dashboard.
- OLAP Cube deployment and management on SSAS.

Enterprise Systems Administrator

Lagos

- Ensured Recovery Point Objective (RPO) and Recovery Time Objective (RTO) for each application is as agreed with the business
- Ensured regular collection of metrics about all of the applications to enable better management of the applications in the portfolio
- Installation and maintenance of system units and business applications.
- Installation and administration of Windows Server Operating Systems.
- Ensured service availability translates into quality user experience enterprise wide Ensured the enterprise derives maximum benefits from SLAs signed with vendors
- Identify areas where the bank can reduce or eliminate expense in application management
- Ensured proper backup, restore and disaster recovery strategy is in place for all applications
- Ensured the bank has a complete inventory of all applications in the bank
- Ensured the availability and accessibility of all enterprise applications bank wide
- Ensured monthly knowledge transfer session on application management in accordance with the organisational policy

Kabir and Associates (Consulting Civil Engineers) October 2006 to August 2007

Civil Engineer

Katsina,

- Experience in detailed drawings of long span reinforced concreted bridges, superstructures and substructures.
- Experience in preparing Bill of Quantities for Road and Reinforced Concrete structures.
- Experience in detailed drawings of Pier caps, Abutments, Staircases, Pre-stressing and other structural drawings.
- Experience in design of Drainage system and Drainage principle in elevated viaduct structures
- Experience in preparing Tender Design, Preliminary Design and Detailed Design structural drawings.
- Preparation of volumetric drawings in AutoCAD 3D for quantity calculations.
- Preparing drawings for construction methodology with alternative methods per different site conditions and construction sequences for precast and cast-in-situ super structure.

Education and Training

OS Concepts Research and Consulting Limited 2015

Attended: Certified Business Analysis Professional Training

Lagos, Nigeria

- Identify the critical principles, activities, tasks, techniques, and tips described in the BABOK Guide
- Cite the core knowledge areas, their activities, tasks, deliverables, and their relationships.

Digital Impetus Consulting

2015

Attended: COBIT 5

Foundation Lagos, Nigeria

- How IT management issues affects organisations.
- The need for an effective framework to govern and manage enterprise IT
- How COBIT meets the requirement for an IT governance framework
- How COBIT is used with other standards and best practices
- The functions that COBIT provides and the benefits of using COBIT
- The COBIT Framework and all the components of COBIT
- How to apply COBIT in a practical situation

Digital Jewels Limited 2012

Attended: ITIL Foundation version 3

Lagos, Nigeria

- Manage business risk and service disruption or failure
- Improve and develop positive relationships with customers by delivering efficient services that meet their needs
- Establish cost-effective systems for managing demand for your services
- Support business change whilst maintaining a stable service environment

SWIFT 2013

Attended: Managing Alliance Access 7

London, United Kingdom

- Updates: installation of patches, message syntax tables and BIC files
- User Management and Security Parameters: profiles, users, passwords and security parameters
- Alliance Gateway Connectivity: configuring Alliance Gateway connections, configuring Logical
- Terminals connections as well as emission and reception profiles
- Message Partners: connectivity of Alliance Access with external applications and printers
- Routing: defining routing rules in Alliance Access
- Message Searching and Reporting: using advanced searching functions and reporting
- Archive and back-up procedures
- Scheduling and Calendar
- System Parameters and Event Log: how to change parameters and how to activate or deactivate alarms
- Using the Monitoring GUI: supervising the new monitoring elements which are only available through Alliance Web Platform as well as using the new multi-instance monitoring tool

SWIFT 2013

Attended: Managing Alliance Gateway

London, United Kingdom

- Alliance Gateway overview
- Full system administration including user management, process control and monitoring
- PKI and security management
- Connectivity with your back-office applications
- Manual and automatic file transfer
- Using a Browse service configuration

Karrox Nigeria, Ikeja Lagos 2012

Attended: Windows Server 2008 Upgrade

Lagos, Nigeria

The course covers many topics at a high level and assumes working knowledge in each from a Windows

Server 2008 R2 perspective: installation and configuration, DNS, PowerShell, Dynamic Access Control (DAC), failover clustering, Microsoft online backup and storage, Hyper-V, Active Directory and Active Directory Federation Services (ADFS), and high availability.

University of Ibadan 2006

Bachelor of Science: Civil Engineering

Ibadan, Nigeria

Awards

Union Bank Employee Recognition (UBER) 2016

Awarded the STAR Award in the Union Bank Employee Recognition (UBER) scheme for outstanding contributions towards the achievement of the bank's corporate goals by going the extra mile in automating the entire process of BI DataMart build system

Tools

Database

Microsoft SQL Server Database 2008 R2, 2012, 2014

Oracle 9i, 10g, 11g

MySQL 5.0

PostgreSQL

CA ERwin Data Modeler ver. 9r

BI Analytics

SQL Server Data Tool (SSDT) - SSAS, SSIS, SSRS

IBM Cognos BI 8 and 10: PowerPlay Transformer, Framework Manager, Decision Stream (Data Manager), PowerPlay Web, Report Studio, Query Studio, IBM Cognos Connection/ Server Administrator/Access Configuration Manager, Impromptu, Upfront

Microsoft Power BI (PowerPivot, PowerView, PowerMap, PowerQuery)

SAP Business Objects BI Platform 4.0 – IDT and Web Intelligence

Oracle Business Intelligence Enterprise Edition (OBIEE 12c)

Source Control

MS Team Foundation Server
